Ambient air quality is being monitored in the country with the help of Manual & Continuous Ambient Air Quality monitoring stations. Presently the network consists of 1257 monitoring stations. Manual monitoring is conducted at 883 stations covering 378 cities/towns in 28 States & 7 Union Territories and Continuous monitoring at 374 stations in 190 cities/towns in 27 States and 4 Union Territories.

The monitoring of air pollutants is being carried out with the help of State Pollution Control Boards (SPCB), Pollution Control Committees (PCC) and other reputed institutes. CPCB co-ordinates with these agencies to ensure uniformity, consistency of air quality data and provides technical and financial assistance.

The data generated through manual & continuous monitoring is integrated for the year 2021 and presented in following table.

Ambient Air Quality Status of the Country during 2021 (Integrated data in microgram per cubic meter)
